

JEEXPERT Brand Guidelines

Logo system, messaging and applications

The wordmark 'Jeexpert' is rendered in a bold, dark blue, sans-serif typeface. The 'J' is particularly large and stylized, with a thick stroke. The 'e' and 'x' are also prominent, with the 'x' having a distinctive shape. The overall impression is one of strength and modernity.

OUR EXPERTISE, YOUR FUTURE

#AchieveMore

Clarity • Trust • Guidance

A consistent identity for international student guidance. This guide defines how to use the full Jeexpert wordmark and the simplified J across digital channels, print and merchandise.

Logo system

One name, one recognisable symbol

Primary wordmark

Use for website headers, stationery, business cards, T-shirts and banners. Keep the custom letter shapes and original proportions.

Reversed wordmark: white on deep blue. Simplified J: white with an azure cap on deep blue, for app icons, profile pictures and favicons.

For stamps and single-colour production, use a solid single-ink version of the wordmark or J. Merge the azure accent into the main shape.

Simplified J

Brand messaging

Use the same wording across every channel

OUR EXPERTISE, YOUR FUTURE

Primary slogan. Place beneath the wordmark on brand presentations, website hero sections, cards and banners. Keep it separate from the logo artwork.

#AchieveMore

Campaign hashtag. Use this spelling and capitalisation in social captions and campaign artwork. Omit it from small icons, favicons and stamps.

Clarity • Trust • Guidance

Clarity

Clear information and understandable next steps.

Trust

Honest communication and dependable follow-up.

Guidance

Personal support throughout the student journey.

Use the slogan for the brand promise; use the hashtag for campaigns.

Colour and typography

Simple, consistent and readable

Deep blue

#173B65

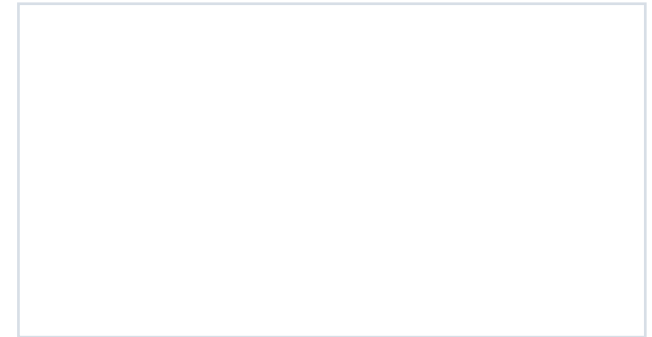

RGB 23 / 59 / 101

Light azure

#80C4EA

RGB 128 / 196 / 234

White

#FFFFFF

RGB 255 / 255 / 255

Poppins

Recommended supporting typeface: SemiBold for headings, Medium for buttons and Regular for body text. The logo is custom artwork; do not recreate it by typing in Poppins.

Use deep blue on white or white on deep blue for essential text. Reserve azure for accents. For print, convert colours through the printer's ICC profile and approve a physical proof.

Digital applications

App, social media, website and favicon

App and profile pictures

Use the J without a slogan. Keep it centred with generous space for rounded or circular crops.

Website and favicon

Wordmark in the header; J in the browser tab. At 16 px, use a simplified single-colour J.

Print and merchandise

Bottle, stamp, card, T-shirt and event signage

Visual concepts. Final placement and production files must follow the specifications on the next pages.

Production specifications

Starting sizes to confirm with each supplier

APPLICATION	LOGO	RECOMMENDED SETUP
App icon	J icon	1024 × 1024 px source; no text or slogan
Social avatar	J icon	1080 × 1080 px; centre within circular crop
Social post	Wordmark and slogan	1080 × 1080 px; hashtag as separate text
Website	Wordmark	SVG preferred; use J for favicon
Favicon	Simplified J	16, 32 and 48 px; test each size
Bottle or flask	Wordmark or J	Approx. 25–40 mm wide; confirm printable area
Rubber stamp	Single-colour logo	Approx. 30–40 mm; omit slogan and fine detail
Business card	Wordmark and slogan	85 × 55 mm; 3 mm bleed; 4 mm safe margin
T-shirt	Wordmark or J	Chest 80–110 mm; confirm embroidery limits
Horizontal banner	Wordmark and slogan	Example 200 × 80 cm; supplier template governs
Roll-up banner	Wordmark and slogan	Example 85 × 200 cm; keep base clear

Sizes are practical starting points, not platform or supplier requirements.

Logo protection and delivery

Keep every application consistent

Clear space

Leave at least one quarter of the logo height free on every side. For avatars, keep the entire J within the central 70% of the square.

Small sizes

Suggested minimum wordmark width: 120 px on screen or 25 mm in print. Use the J when space is smaller. Keep the slogan readable or omit it.

Correct use

Keep proportions, colours and original letter shapes. Use uncluttered backgrounds. Avoid stretching, rotation, outlines, shadows or replacing the custom lettering.

Production files

Prepare vector masters in SVG and PDF, transparent PNG exports, reversed versions and single-colour versions. Use supplier-approved bleed, safety margins and colour profiles.

This guide contains approved visual concepts and application mockups. It is not a vector master pack. Before manufacturing, rebuild and verify the logo artwork as vectors and test small-size legibility.
